Updating Student Manager 8.0

- 1. Download the sm8.exe: http://www.aceware.com/80version/exe/sm8.exe
- 2. Get everyone out of Student Manager.
- 3. Copy the sm8.exe into your Student Manager folder, overwriting the existing file.

Once the file is copied into the folder, everyone can get back into Student Manager.

IMPORTANT: 8.0.126 requires new DLLS and other files (clrhost.dll, newtson.json.dll, sm8.exe.config, wwdotnetbridge.dll, wwdotnetbridge.xml, wwipstuff.dll). When you first start the 8.0.126 update, it will inform you if you need new DLLs and *download the zip for you. Unblock the zip then extract the DLLs to your Student Manager folder.

*You will need the Customer Resources credentials to download the DLLs zip. Contact your ACEware technician if you don't have those and they will be provided to you.

Unblocking Files

When downloading the sm8.exe or the DLLs zip file, you may need to unblock it before moving the files into your Student Manager folder. To unblock files:

- 4. Right-click the file.
- 5. Choose Properties from the menu.
- 6. On the Properties window check the Unblock box.
- 7. Click the **OK** button.
